```
class Classname {  
    datatype varname ;  
    void methodname(input parameters){  
        // body of method  
    }  
}
```

```
datatype varname = value ;  
  
String name = "Pavan";  
  
int age = 23;
```

sty:->

```
void methodname (input parameters) {
```

```
// Operations
```

```
// instructions
```

```
// logic
```

```
// sub program
```

```
// chunk of code
```

```
// code
```

```
}
```
